SUEZ treatment solutions UK

a complete service for water purification, conditioning, industrial water and wastewater treatment
**core competencies**

**water:**

Management solutions for the entire water cycle: protection of resources and natural environments, production of drinking water, cleansing wastewater, management of network infrastructure and smart solutions to optimise water usage and preserve resources for the future.

<table>
<thead>
<tr>
<th>80,000 employees</th>
<th>323,000 industrial and business customers</th>
</tr>
</thead>
</table>

**treatment solutions:**

Water treatment solutions for the production of drinking water, seawater desalination, sludge treatment, wastewater purification and recycling, including the design, construction, operation and financing of water treatment plants and systems.

<table>
<thead>
<tr>
<th>74,000,000 euros invested in resource-focused R&amp;D</th>
<th>14,000,000 tonnes of recovered waste</th>
</tr>
</thead>
</table>

**waste recovery:**

Managing materials, energy and recovery solutions for all types of waste to secure existing and produce new resources, including research and consultancy, collection, sorting and dismantling, recycling and specialised services.

<table>
<thead>
<tr>
<th>65,000,000 benefiting from sanitation services</th>
<th>10,000,000 people supplied with drinking water</th>
<th>5,138 GWh of energy produced each year in the world from waste</th>
</tr>
</thead>
</table>

**consulting:**

Innovative consulting solutions, including technical, economic, environmental and social aspects for the sustainable design of cities and land-use to ensure the protection of resources.
SUEZ Water Purification Systems UK designs, develops and manufactures advanced, high performance water purification systems.

These are engineered for use in many different applications, from benchtop and ring main systems for laboratories, to high purity systems for renal dialysis, and high volume systems for use throughout industry.

In every case, systems are engineered to the highest quality standards, give guaranteed levels of water purity, up to 18.2MΩ, are easy to use and maintain, with low operating costs and an excellent return on investment.

technologies include:

- Ion exchange
- Carbon adsorption
- Reverse osmosis
- Softening
- Ultrafiltration
- Ultraviolet
- Organic scavenging
A complete range of **water purification and treatment solutions** for the UK industrial, process, laboratory and healthcare sectors.

**SUEZ Industrial Water UK**

SUEZ Industrial Water UK provides a full range of services for the optimisation and management of the complete industrial water cycle.

These services range from system design, engineering, installation and commissioning, to operations and maintenance, on-site engineering, laboratory analysis and consultancy. In each case, the innovative use of new and existing technologies is combined with custom engineered solutions and backed by the knowledge, expertise and resources of the global SUEZ business.

This unique offering allows SUEZ Industrial Water UK to manage customers’ complete water resources, delivering cost savings, process efficiencies and environmental compliance, giving every customer the opportunity to focus profitably on their core business.

**specialised services include:**

- Process design and engineering
- Operations and maintenance
- Site services
- Laboratory services
- Audit and feasibility studies
- Equipment and installation
- Refurbishment and improvements
- Consumables and spares
- Temporary water treatment
Our services include: equipment design and manufacture; site engineering; operations; maintenance; laboratory services; chemistry; consultancy; and long term customer support.

SUEZ Water Conditioning Services UK

SUEZ Water Conditioning Services UK develops and manufactures an extensive range of water treatment chemicals for use throughout industry.

The product range is supported by specialised water treatment services including water system cleans chlorinations, laboratory analysis, risk assessments, compliance audits and Ofqual accredited training courses, designed to help customers enhance site safety, efficiency and productivity. The UK-wide network of water treatment experts are also well-positioned to provide specialist support and consultancy for healthcare premises and hospitals.

Throughout, the goal is to use proven, tried and tested chemistry, combined with intelligent and innovative research and development, and with advanced engineering and systems support, to deliver a unique offering that adds real value to every customer’s business.

services include:

- Consultancy
- Water hygiene services
- Own label bulk supply of chemicals
- Compliance and risk assessment
- Training academy
- Oil & g as chemicals
- Effluent services
- Water treatment plant and equipment
